

Roller Dryer

“Hi-Jet” Roller Veneer Dryer

"Hi-jet" roller dryers for peeled veneer, equipped with cross feed charger for the loader, automatic loader, automatic loader, automatic temperature and air drying moisture control.

Heavy frame with laminated beams, sealed panels with 4" fiber glass insulation, frequency inverter for speed variation, oversized radiators with finned elliptical tubes that can be heated with steam, hot water or thermal oil, aluminum fans with adjustable blade pitch for high yield, jet boxes with guide-type profile to avoid "plug-ups" and increased number of "nozzle" type holes.

High capacity dryers with low energy consumption.

4 deck, with working width of 4.8 or 6.0 m.

Capacities from 0.5 to 10 m³/h optionally equipped with automatic loader / unloader
