

Omeco Peeling Lathe

Brand:	Omeco	Max width:	4'
Model:	Spindleless	Max log Diameter:	400 mm.
Serial number:	N/A	Power:	23 HP

Spindleless lathe, perfect for plywood peeling veneer, it re-utilizes the log core that were scraped from the conventional lathes with spindles.

Working together with a rounding-up lathe wit spindles, this machine can also be utilized for the production of veneer with smooth surface and uniform thickness, from small diameter logs.
